

Simon Webbe, A Little High

Stranded

I've been watchin while your buring bridges, around you
Think your helpless,
Broken by then alibi's and promises that wernt true

But its not all bad

You no that you can bring it all back
Reach out and find what you once had
You'll see if you read all the signs

[chorus]

I can see that your in need of some protection
Dont fret dont cry
Just go ahead and change it
Just gota face it
Everybody needs a little high
I can make you the centre of attetention
Let me dry your eyes
{cant get these
Two lines}
Everybody needs a little high

Oh your life is wasted,

The colours in your heart are slowly fading, inside you
Branded by the words you heard, that left you jaded, confussed

But its not all bad

You no that you can bring it all back
Reach out and find what you once had
You get where you want if you read all the signs

[chorus]

All your mistakes are easy to change
Dont let regrets stand in your way
Your intuition on which way to take
Woah, yeah

[chorus]
