

Simon Webbe, Give A Man Hope

I was damned from the day i was born
No wake up call
I was locked into falling apart
And said to waste it all
I was out of control, cold
And i think it showed
And its gettin hard to play the part, but its all that i no
And its getting so complicated (so complicated)

[chorus]

I guess what im trying to say is
If you give a man hope, you no, something to believe in
You get more if you give a little sometimes
(you get more if you give a little sometimes)
Forget about gold, oh no
You no you don't need it (you don't even need it)
Its clear to see,
You gotta give a man hope,
You no, you no, you no, you gotta give a man hope

No where to stay, no place called home
What happened here, when you step into the unknown,
Outside my comfort zone
Oh yeah
I'm not the man you used to no
I'm in control, gonna kick back, relax
Not my low (not to sure on this line)

'caus its gettin so complicated (so complicated)

[chorus]

Things will never be the same again
Give a man a little trust and faith
A ray of light, i can see day break ahead
A little confidence is all it takes
And whatever happens from today,
They see the good in me, the light comes shinning through

[chorus]

If you give a man hope, you no, something to believe in
You get more if you give a little sometimes
You get more if you give a little sometimes
Forget about gold, oh no
You no you don't need it (you don't even need it)
Its clear to see
You no you no you no, you've gotta give a man hope
