Simple Minds, SPIRITED AWAY

I'm not a complicated guy I like life as simple as can be There's so much I don't understand So much I fail to see

But we got spirited away Got separated in the night Somehow we drifted from our path Spirits in the night Spirited away

Somehow the doors became unlocked And our love just slipped away Back then I hoped that we could talk Though I don't know what I'd say

But we got spirited away
And separated in the night
Somehow we drifted from our path
Spirits in the night
Yeah we were spirited away
Into some time some other place
Where I would learn to live with lies
And I would never see your face
Spirited away

Years have passed since then So many moments I have spent Memories don't fade with time Maybe this is how it's meant That we would separate like stars Together since birth No longer see things from afar No longer walk on the same earth

Cos we were spirited away
Got separated in the night
Yeah we drifted from the path
We took our own internal flight
Yeah we were spirited away
Into some time some other place
Where I would learn to live the lie
But I would never see your face
Yeah we were spirited away

I'm not a complicated guy I like life as simple as can be There's so much I don't understand So much I fail to see

But we got spirited away
