

Simplified, You The Moon And Me

Been a long long day, girl I'm on my way
I can't wait to play with you the moon and me

Woke up with the sun and, I put my hands to my weary head
Got to hit this day running, cause it's you at the very end

Daydreaming about you and the nights that's sure to come
Gonna put my arms around you and we gonna have some fun

Been a long long day, girl I'm on my way
I can't wait to play with you the moon and me
Stars in the sky not as bright as your eyes
Gonna' spend the night just you the moon and me

I knew when I met you and I know you knew it to
But you wouldn't admit it and I chased after you

Although there's hard times, yeah we been through a few
It's only getting better, always together, you and I holding on

Been a long long day, girl I'm on my way
I can't wait to play with you the moon and me
Stars in the sky not as bright as your eyes
Gonna' spend the night just you the moon and
You the moon and

In another life, this was you you and me, now this one's the same
In another life, this is more than luck, always be the same
Be the same

Been a long long day, girl I'm on my way
I can't wait to play with you the moon and me
Stars in the sky not as bright as your eyes
Gonna' spend the night just you the moon and me

Been a long long day, girl I'm on my way
I can't wait to play with you the moon and me
Stars in the sky not as bright as your eyes
Gonna' spend the night just you the moon and me

You the moon and
You the moon and me
You the moon and me
You the moon and
You the moon and me

In another life, in the city, in another life
You the moon and me
You the moon and me
