

# Skrewdriver, From The Land

I stand and watch my country today  
It's so easy to see that it's being taken away  
All the immigrants and all the left wing lies  
Why does no one ever ask the reason why

(Chorus)

We were the country that had everything  
We were the country, Rule Britannia we would sing  
We were the country, and we could never lose,  
Once a nation, and now we're run by Jews  
We want our country back now!

It's time our people stood together side by side  
It's time we stood and fought against the media's lies  
The capitalists and the communists, well they co-exist  
If you love your country, you'll be on their list.

The sands of time are running out for this land  
It's time the people stood and raised their hands  
It's time we drove out the traitors that we can see  
Now is the time this nation should be free, free my land
