

Sky Harbor, Who Needs A Girl

Headlights are my shooting stars at night
The fog on the window is the morning dew
The moon is lit by the pale dome light
But why are my dreams filled with you?

Who needs a girl when I've got this guitar?
Who needs a girl when she'd only be too far?
Who needs a girl to brighten my day; to miss when I'm away,
Who needs a girl?

The road is my best friend today
Conversations with the scenic view
We sing songs with the clouds and the rain
Why are they all about you?

A girl to brighten my day
A girl to miss when I'm away
We all need someone to miss when we're away

Sometimes I need a girl just like I need this guitar
Sometimes I need a girl even if she is too far
Sometimes I need a girl to brighten my day; to miss when I'm away
I need a girl
