

Slade, I Remember

Coming up fast on a different line I was early for once
Stop so I looked all around at the chance and I was early for once
Won't take long to get out of this place
Got to take a chance decide my own fate

It's clear now to see the only past left for me is what the future brings
I'm sadly alone and when I'm all on my own my baby gets to moan
She can't recess me for my name and address
I stumbled for thought at it's simple request

Chorus

I remember it

I take a long deep look at the things that I took but it still isn't clear

Break

My kid said hello and I didn't reply you see my memory was gone
That the fire in the grass it just wiped out my past and my memories gone
Won't take long to get out of this place
Got to take a chance decide my own fate

Chorus

I remember it

I take a long deep look at the things that I took but it still isn't clear
