

# Slapshot, What's At Stake

Stick the needle into your arm  
Do anything that does you harm  
I see you falling down on the floor  
I see you staggering out the door

You tried it and you liked it and you thought that  
You could take it  
Until you realized you couldn't escape it  
How far you fall you don't know  
Until you're at the bottom with a nose full of blow  
You don't know what you're to me  
To see you laying there so helplessly  
Get yourself together, before it's too late  
Or a life of pain will be your fate

You don't care about anyone  
Just so long as you've had your fun  
But not until you get your fix  
And now you're taking a deep six

You tried it and you liked it and you thought that  
You could take it  
Until you realized you couldn't escape it  
How far you fall you don't know  
Until you're at the bottom with a nose full of blow  
You don't know what you're to me  
To see you laying there so helplessly  
Get yourself together, before it's too late  
Or a life of pain will be your fate

You tried it and you liked it and you thought that  
You could take it  
Until you realized you couldn't escape it  
How far you fall you don't know  
Until you're at the bottom with a nose full of blow  
You don't know what you're to me  
To see you laying there so helplessly  
Get yourself together, before it's too late  
Or a life of pain will be your fate

What's at stake  
What's at stake  
What's at stake
