

# Smoking Popes, Midnight Moon

Midnight Moon I hold you for this perfect night  
Love is born to linger in your magic light  
With that girl beside me and you above  
You must also be in love

Midnight Moon that bathes me  
She's got an angel face  
Meet us here tomorrow night in the very same place

Midnight Moon  
Midnight Moon  
Don't go off till then, too soon

Wait until she knows how I feel about her  
You and I simply can't go on without her

Girl beside me and you above  
You must also be in love  
In love, in love, in love
