

Smooosh, Make It Through

Calling the shots from time to time
I thought we could make it
But maybe I was wrong

Calling the shots from place to place
I though we could make it
But maybe I was wrong

Calling the shots from time to time
I thought we could make it
But maybe I was right

If you are what you are
And I am what I am
I think we can make it through

Cause we're gonna go on
And I never knew
I thought we could
But I never knew

And I hope it doesn't matter
Cause we were so alike

If you are what you are
And I am what I am
I think we can make it through

Cause first I was awakened
And then just mistaken
About what I didn't know

Cause if you go into something
Headfirst
It might not come out right

Calling the shots from time to time
I though we could make it
But maybe I was wrong

Calling the shots from time to time
I thought we could make it
But maybe I was right

If you are what you are
And I am what I am
I think we can make it through

Cause if you are what you are
And I am what I am

Cause if you are what you are
And I am what I am
I think we can make it through

Because when we tried to go
I never knew
And I thought we could
And now when I look back
I thought we would
I think we can make it through

Cause first I was awakened
And then just mistaken

About what I didn't know
