

Social Siberia, Summer

Summer, she said "Let's wait for summer"
But we should now have to wait this long

Somethings are always gonna get me lean back
I'm at least as miserable as you (it's just like it should)
So just waste your time with me
We don't need to do a shit

Because everybody wants
Summer, she said "Let's wait for summer"
But we should now have to wait this long

Yeah you owe us summer, we fucking deserve summer
Just a little bit of heading forward till we end up behind bars
That's fine

Somethings are always gonna fool me, baby
Rock, papers, scissors - jokes on you
Be ????????
No matter what you think is right
I'd be the one to shake you
No matter how hard you close your eyes
to wish it all away

So just waste your time with me
We don't need to do a shit

Because everybody wants
Summer, she said "Let's wait for summer"
But we should now have to wait this long

Yeah you owe us summer, we fucking deserve summer
Just a little bit of heading forward till we end up behind bars
Again-----
Again.
