Sofa Surfers, Never Go Back

Make space I can't breath for the smell of fear I had a vision of the future And the future Wasn't there...

Erase

Everything that you thought you knew I had a dream A dream about the future and I wasn't there Neither were you

You can never go back Never go back You can never go back

No home
Wear your failure like a brand new badge
No soul
No right to a soul
Pick the bones clean

No hope Wear your failure like a shiny new pin No soul No right to a soul Pick the bones clean

You can never go back Never go back You can never go back

Make space I can't breath for the smell of fear Make space I can't breath for the smell of fear Make space I can't breath for the smell of fear

Make space I can't breath for the smell of fear I had a dream about the future And the future wasn't there And neither were you...

You can never go back
