

Soft Machine, She's Gone (2? Vers?o)

That's all right, you can take all night
My little woman has gone
Babe ----- your name
It's just not the same
And I think you're someone else

She's gone - my baby's gone
My little girl has gone

After all the scenes we had
You can't stop me feeling sad
But won't you let me leave my mind behind?
But baby, I treat you kind, so...

That's all right, you can take all night
My little woman has gone
