

Solabeat Alliance, Blindside

All around us is fighting, all around us is war,
Man of a higher tongue against man said what are we fighting for?
You can't solve no problem using weapon and fist,
Won't you take the time to open your eyes see solutions exist

We carry on, we carry on,
Light shine we shed so tear, blindside,
Hold on tight the end draws near,
And still we carry on

A cast of thousands, stands bravely to fall,
Man of a higher tongue against man said this is anothers call,
We dance a solution, we dance through the night,
This ain't no revolution it's just freedom to do what's right

Standing in the moonlight, clear sky stars bright,
Waiting for sunrise, hot shot, flood light,
Holding out my hands not looking for an answer,
Turning to the next now we become the dancers,
Thinking about the words we used to sing together,
We were going to change the world going to make it last forever,
Hear the words that you say, hear the words that you say....
