

Solid Harmonie, Live A Little

Live a little, just live a little
Live a little, just live a little

Been asking questions what's the deal on how I feel for you
When you should know by now I live for you I'd die for you
Sometimes I wonder baby what your doubt is all about
If anybody knows me you should know me inside out

BRIDGE:

No need to pay so much attention (yeah, yeah, yeah)
To chasing shadows in the dark (yeah, yeah, yeah)
Get the best intentions, only love inside my heart
You need to live a little

CHORUS:

Ooh relax and feel the flow, you need to live a little
It's better when you just let go, you need to live a little
Ooh don't question what you know, you need to live a little
Ooh baby baby baby, you need to live a little

I'm always down for you it's true that you're the only one
I act the way I do around you 'cause you turn me on
Why can't we spend more time making love not making fights
That end with you at home and me alone more lonely nights

BRIDGE

CHORUS

You're all I want - nobody else
Baby I live for only you
I'm never gonna change - don't try to rearrange
You need to live a little

CHORUS
