Someone Still Loves You Boris Yeltsin, I Am War

We've got amnesia from the slightest problems you start shaking and you start talking

takes more than working now to keep you from falling 'cause work is starting and things are falling I'm in a real good place to light out without leaving a trace you said i was the only one now i just don't know whats going on

we don't get out very much we don't get out very much I'm afraid were loosing touch with our balled up little crowd when we get out and get drunk and we get high and don't talk we just walk and walk and walk until we find ourselves alone but at least we've got each other

it's not so bad if you can't remember this is just an excuse for something

we have got amnesia from the slightest problems you start shaking and you start talking

alone where i can't be you alone where i can't be you i don't think a lot about you I've been thinking a lot about you
