Sonique, Love Is On Our Side

I'll be around, love is on our side I'll be around, love is on our side Love is a 2 way street Didn't know what pain could bring Time has shown me the way Now I'm here for a brighter day For the first time in my life I can really see the light In hearts we both have found True love won't let us down I'll be around, love is on our side I'll be around, love is on our side Now more than anytime I need you in my life Joy will be our guide Keep the feeling rain or shine Tender moments fill my mind They remain till the end of time Clouds are gone, the skies are clear And a deeper love appears I'll be around, love is on our side I'll be around, love is on our side
