

Sophie Ellis-Bextor, Lost in the Sunshine

The faded colours
In the light
I feel no one can touch us
We're alright

I'm gonna take a moment
Breathe it in
Not just your image, baby
Warmth on skin

Scent of flowers
Taste of blue
All my seasons
You

Let's get lost in the sunshine
And give ourselves to the summertime
An afterglow in clementine
And now the heat is growing

Our blanket covers
The greenest grass
And it's so very tranquil
Let it last

As the ice is melting
Sun overhead
A breeze to shake the branches
Nothing said

Scent of iasmine
Taste of blue
All my seasons
You

Let's get lost in the sunshine
And give ourselves to the summertime
An afterglow in clementine
And now the heat is growing
We're getting lost in the sunshine
Margaritas by the riverside
We're gonna let the hours slide
And keep the good times going

Forever always in my mind
I go there when I need to
Forever always in my mind

And when I need to lose some time
You're there when I reach for you
Forever always in my mind

Let's get lost in the sunshine
And give ourselves to the summertime
An afterglow in clementine
And now the heat is growing
We're getting lost in the sunshine
Margaritas by the riverside
We're gonna let the hours slide
And keep the good times going
And going
And going
