

# Sophie Ellis-Bextor, Today The Sun's On Us

I can see you're somewhere far away  
Caught in another place  
Where nothings going right  
Shouldn't worry about  
The worst that could be  
When you're here beside me  
Don't look for troubled times  
Now when everything is fine  
[Bridge:]  
So you need to fear the bad to see the good  
And that's the thing you do  
But don't let it spoil the view  
Of what's around you  
[Chorus:]  
There's no rain, there's no storm  
Though the blue sky makes you wonder  
Don't you fear what will come  
Will come  
And right now we're in the sun  
Sure enough, seasons change  
But don't let today get lost  
'Cause today the sun's on us  
Today the sun's on us  
You're so restless

Underneath the surface  
Don't you think I notice  
It's something you can't hide  
When you're fighting with the tide  
But you've got to let it go  
And just accept the things you can't control  
Don't let your shadow spoil the view  
Of what's around you  
[Chorus]  
The years go by  
Stars will rise and fall  
Will you be by my side  
Though it all?  
[Chorus]  
Today, the sun's on us
