

Sparkadia, Jealousy

I can't sleep - I can't eat - I can't leave till I have my peace
No more fights - no more wars - No more deals to settle our scores
I won't hide - I won't go - become someone you used to know
Cos there's a little bit of me - in a little of you
Don't deny what you know is true

Jealousy - look what it's done to you - look what it's done to me - Jealousy

I've been there - on the other side - trying to get her to change her mind
Hanging out - dropping in - trying to revive what had once had been alive
I know exactly how it goes - you think you can change the girl you used to know
There's a little bit of me - in a little of you
Don't deny what you know is true

Jealousy - look what it's done to you - look what it's done to me - Jealousy

If you don't leave it - you'll never be free of it
If you don't leave it - you'll never be free of it
If you don't leave it - you'll never be free of it will eat you up
and spit you out
When you try to get to her - she'll never hear you even when you shout

Jealousy - look what it's done to you - look what it's done to me -
Jealousy - I know what lies below - I already knew this long ago -
Jealousy
