

# Sparks, Just Got Back From Heaven

(Ron & Russell Mael)

All I get is quiet  
Laughing friends won't buy it  
I've been known to tell them white lies  
But this time I swear it's the truth, oh, oh  
I just got back from heaven

I can see their faces  
As I mention places  
Places that I've overdescribed  
But this time I swear it's the truth, oh, oh  
I just got back from heaven

Heaven isn't so far away  
You walk through the door  
And you're light years away  
Someone looks right into your eyes  
And you feel the magic that you can't deny  
And you sway  
All through the night  
If you stay  
All through the night  
Look at the shape I'm in  
I just got back from heaven

Searching for some glory  
People make up stories  
One too many drinks at the bar  
But this time I swear it's the truth, oh, oh  
I just got back from heaven

Heaven isn't so far away  
You walk through the door  
And you're light years away  
Someone looks right into your eyes  
And you feel the magic that you can't deny  
And you sway  
All through the night  
If you stay  
All through the night  
Look at the shape I'm in  
I just got back from heaven

Any destination  
Makes a great vacation  
This is something greater by far  
This time I swear it's the truth, oh, oh  
I just got back from heaven
