

# Spheric Universe Experience, Now Or Never

Constant obsession of fatal illusion  
Day after day I will fight my redemption  
Sad cotemplation of the whole creation  
Nothing to say 'cept the words of deception

&quot;Leave me or trust me&quot;  
She's going to kill me  
Oh I swallow my anger  
I swallow my pain...

Wake up from your dream  
You know you're a pilgrim  
Racing the clock of time  
Without reason and rhyme

You feel warm and secure  
But you're lost and worried  
Your heart is nice and pure  
But inside you're exhausted

I will find the truth or pay forever  
Blameless and confused, it's now or never  
Now or never

Tortured mind 'cause now I'm blind  
From the hell of my soul to this dirty black hole

All around the world  
You're looking for your way  
All these things you've heard  
But sure you'll never pay

Life is like a prophecy  
And time is the enemy  
Falling into desolation  
My words are premonition

Now or never  
Who...  
You know time is the enemy...
