

Stanhope, Deceitful You

Let's just say you'll never know
You're the one who let this go
Every time you try to make it up
It always ends up falling up falling up on
So let's work this out
Then now it's time for me to go
Well I've had my doubts
Just never let them show
I can read you like a book
Well baby, the game is shot
Look where we are, look who we are now
Let's just say you'll never know
You're the one who let this go
Every time you try to make it up
It always ends up falling up falling up on
So what time is now
Every little mistake you make
What we had to do
Well baby, the game is shot
Let's just say you'll never know
You're the one who let this go
Every time you try to make it up
It always ends up falling up falling up on
Go!
Let's just say you'll never know
You're the one who let this go
Every time you try to make it up
It always ends up falling up falling up on
