

# Starsailor, Love Is Here

If you could see the lover in me  
And we can join our hands together  
You could see how good it could be  
We'll sing these stupid songs forever

Can you feel it?  
Love is here  
It has never been so clear  
You can't love what you have not  
So hold on to what you've got

Is Trudy really smiling for me?  
I'd change my name in case she found me  
Trembling I can't believe  
I've got to leave the girl behind me

Can you feel it  
Love is here  
It has never been so clear  
You can't love what you have not  
So hold on to what you've got

If you could see the aching in me  
I'd change my name in case you lost me  
Trembling down to my knees  
I've got to leave the world behind me

Can you feel it  
Love is here  
It has never been so clear  
You can't love what you have not  
So hold on to what you've got
