

Start Trouble, Chemical

(verse 1)

Its funny how it all just fades away
to soul decay
from the things the world can say
or can i say
everybody needs a little moment of truth
when they find a new
a new way to live with themselves
nobody ever had a clue
or knew what to do
when they had a little feeling called love
and nothing ever had to wait
if it came to hate
cause you can hate anything before you even try to love it

(Chorus)

love is a chemical
straight from your genitals
never is spiritual
never unconditional
love is a chemical
nature is radical
never is spiritual
its mathematical

and everything you've ever known today
is all the world can give you
dont believe in love or hate
its only a chemical

(Verse 2)

yeah im sorry that you never understood
it'll do you some good
if you look around and find out for yourself
you need a little push to shove
test your love
will that person burn for you
love is a beautiful way
to face the day
but everybody's got it wrong
everybody's got it wrong

(Chorus)

love is a chemical
straight from your genitals
never is spiritual
never unconditional
love is a chemical
nature is radical
never is spiritual
its mathematical

and everything you've ever known today
is all the world can give you
dont believe in love or hate
its only a chemical

and i dont wanna be the one who has to look back
knowing my whole life was a lie
i dont wanna be the one who has to replay
everything they've kept inside
and i dont wanna spend another minute caring for the
things that dont mean anything
I never gave a damn about

I'll never be
I'll never be your sacrifice

(Chorus)
love is a chemical
straight from your genitals
never is spiritual
never unconditional
love is a chemical
nature is radical
never is spiritual
its mathematical

and everything you've ever known today
is all the world can give you
dont believe in love or hate
its only a chemical

and everything you've ever known today
is all the world can give you
dont believe in love or hate
its only a chemical
ohhhh chemical
chemical
chemical
oh chemical
