

Static X, Machine

I see your bleeding dark side
I feel your angry heart
Reveals forbidden places
More monster yet alive
No faith
Changing into something less than human
No longer part of this
The influence
Changing into something less than human
No longer part of this machine
No mind
Changing into something less than human
No longer part of this machine
It's chemical
Changing into something less than human
No longer part of this machine
Get into my hidden demon
Get out of my swollen head
Shines down on blackened faces
Changing at your expense
