

# Status Quo, When The Mind Is Not Live

(Parfitt/Rossi)

When my mind is not live I see you there before me  
Every night in my mind your face flies by me  
Then the morning light comes to bring reality  
But my dream lingers on a little while for me

Then I wake to see a world full of misery  
Lots of people rushing by, never know what they wanna be

Soon the day draws to it's end and pretty soon I'll be  
Back with you in my mind because I want to see

When my mind is not live I see you there before me  
Every night in my mind your face flies by me
