

# Steadman, Next Life

It's nearly time to set the wheels in motion  
We've got ideas this world won't allow  
Got us so far this notion  
It's how we came to be the stars we are

Where did it all go?  
Will I get it in the next life?  
Oh you think that you know  
But we will never walk the same line

When we come we will come together  
Safe in our little bubble world  
Giving the best devotion  
Making off in a cloud of smoke

Hit Me  
Hurt me  
Kill me  
I get what I deserve

Kiss me  
Love me  
Thrill me  
Get what I deserve

Where did it all go?  
Will I get it in the next life?  
Oh you think that you know  
But we will never walk the same line

Put on your running shoes  
You're never gonna win the race 'til you do  
We all have hidden truths  
You're never gonna race again if we lose

Where did it all go  
Will I get it in the next life  
Oh you think that you know  
But we can never make the deadline  
Put on your running shoes  
You're never gonna win the race til you do  
We all have our issues  
We're never gonna face the day if we lose X2
