

Stephen Kellogg, Anthem Of Our Discovery

Talked about things that make your mind spin
She's gone like a mystery
She's gone like the wind
To touch anything real you could stay up all night and transcend
It always ends up the same in the end.
A little tired

She was beautiful, She was beautiful
Well I got shadows of dust,
Covers up my heart,
And I got this picture of beauty
That she is essence and she is art
When the sun shines through your window
Some virgin mystic
All the history you've forgotten
You know it's bound to repeat
We'll make it tired, cuz you're tired just like me

She was beautiful, She was beautiful

When the weathers just moved like
The two of you have done
You can't melt the moon and I can't freeze the sun
We'll make it tired, cuz you'll be tired just like me
She was beautiful

Well I've been stoned as a junkie,
I've been proud as a beast
And I've got these thoughts in my mind
Their like a lonely man's feast
Give me your victory song
How bout an anthem so sweet
Make it fly, Like a child who's got the wings upon his feet
Make it fly, Like my brother 10 years younger than me
He got the heart
So why, just legacy

Make it fly, Like a child who's got the wings upon his feet
Make it fly, Like my brother like I got wings upon my feet

Make it tired, cuz you're tired just like me
She was beautiful, She was beautiful

When the weathers just moved like
The two of you have done
You can't melt the moon and I can't freeze the sun
We'll make it tired, cuz you'll be tired just like me
She was beautiful, She was beautiful, She was beautiful
