Steve Miller Band, Lost In Your Eyes

(Leo Sidran)

So you found someone
You found some heartache
You found some fun
You had some give and take
You had a friend
You had a fight
You saw it end
And then you're up all night

Have you seen the way she walks The way she smiles at me Laugh a while and talk a lot And you're beginning to see

That you get lost in her eyes She takes you away You start to talk And time it flies She takes you away

She takes her time and leads you on And then she lets you go Time to time she'll lead you on And then she'll let you know

Then you get lost in her eyes She takes you away You start to talk And time it flies She takes you away

Then you get lost in her eyes She takes you away You start to talk And time it flies She takes you away

You found someone
You found some heartache
You found some fun
You had some give and take
You had a friend
You had a fight
You saw it end
But that's alright

Have you seen the way she walks The way she smiles at me Laugh a while and talk a lot And you're beginning to see

That you get lost in her eyes She takes you away You start to talk And time it flies She takes you away
