

Steve Vai, Survive

Get ready for your life
won't you take your place in line
You may close your eyes if you please.

Try to keep it clean
there's so many here you see
everybody needs to get by.

And if you fall on your face on the way
you'll get it together someday.

Chorus:
Like the sun in the sky
we fall and we will rise
Helping each other survive

Just like the animals
we need to carry on
or how would we ever survive?

Prejudice is pain
just like poison in your veins
Burning up your hope and your strength.

Freedom you will find
in your spirit and your mind
Nothing ever can take that away.

And when your castles of sand melt in the sea
Mountains will move with your faith.

(Chorus)
