

Strangelove, Beautiful Alone

I'm not the same as you
That's always been the problem
It's a problem that we hide away but true
Something UNSAID
That hangs between the future
It's a future that we never had but true
I remember stars above her
Scattered through this sky just for her
And how very much I loved her
Beautiful Alone
Everything and always to me
Everything and always was she
Beautiful Alone
Some people say to you -
They want to be your lover
They want to turn you into something else not you
Same people wait
They're saving up their hatred
Just for twisting knives into the back of you
I remember stars above her
Scattered through this sky just for her
And how very much I loved her
Beautiful Alone
Everything and always to me
Everything and all the thing to me
Beautiful Alone
