

Strife, Grey

The future is dead for many of those who have fallen refusing to let it go
Addiction we're victim of affliction
We're choking these walls are caving in
We keep pushing
This world is bleeding
Is this our destiny?
We've built and constructed a false progression
Is this our destiny?
It's not just the fire pumping through our veins
It's not just the cancer we inhale
It's not just the poison we keep drinking... it's everyone
It's you and me
We keep pushing
This world is bleeding
Is this our destiny?
We've built and constructed a false progression
Is this our destiny?
It's not just the actions of our hate
It's not just the division we create
It's not just the one sex, color or creed... it's everyone
It's you and me
Is this our destiny?
