

Stuck Lucky, We Really Don't Care

Wasting all your time, making plots in your tower
(There's a) huge fucking hole in the fence of the graveyard
Bones are easy to crack, biting concrete is hard
So will you sit here with me while the sun sets
Too dark on top of this loney
Building too see with me
Said we really don't care (Just get me out!)
Said we really don't care (Just get me out!)
Said we really don't care (Just get me out!)
Said we really don't care (Just get me out!)
Pack my bags and throw me a beer
Send my love just get me far from
Same old rides, same old wrongs
Same lame kids sing the same old songs (ha, ha)
In my mind there's more for me
A place that I am meant to be
A smile that's not attached to a face
Get me the hell out of this place
Said we really don't care (Just get me out!)
Said we really don't care (Just get me out!)
Said we really don't care (Just get me out!)
Said we really don't care (Just get me out!)
Baby please help me get out of this state
With a shot to the head, with that look upon your face
Too many brains to stick around this place
Just get me the fuck out of this state!
Said we really don't care (Just get me out!)
Said we really don't care (Just get me out!)
Said we really don't care (Just get me out!)
Said we really don't care (Just get me out!)
