

Styx, Right Away

(Paul Frank)

I have seen you
walk in my dreams
casted high against the sky

let me meet you
let me greet you inside
take your place right next to mine

yes I say

right away, right away
right away, right away
right away, right away
right away, right away

leaves have fallen
since I saw you last
slowly die from green to brown
in which way we choose
to live our lives again

I'm gonna lay some seeds
I'm gonna leave them laying right on the ground

right away, right away
right away, right away
right away, right away
right away, right away

right away, right away
right away, right away
right away, right away
right away, right away

right away, right away
right away, right away
right away, right away
right away, right away
