Submersed, At First Sight

You're looking so beautiful standing in the light I've waited for this night for my whole life I reach to grab your hand I take it into mine Our hearts become numb Our hearts have become one And I'll wait for you If our worlds falling down cumbling to the ground And I'll wait for you If our worlds falling down crumbling to the ground

With this honor On weak knees I stand strengthened by your hands

As the music starts to play that look upon your face I see whats in your eyes, you see whats inside mine We see our life together we feel it as we dance Theres rhythm in our love its rhythm from above And III wait for you If our worlds falling down crumbling to the ground And III wait for you If our worlds falling down crumbling to the ground

With this dance our life begins With these steps love has no end With this dance our life begins And III wait, and III wait
