

Sugababes, Denial

It's been hard to come to you lately
It's been easier to stay away
And I can't feel the heat not the one that we would need
There is something wrong there's a wall in between

Wait
We can't fall now
We cannot leave all we have
I know it hurts and feels bad
We should stay
And just fight back
We had it once all the way the whole story
And it will hurt
But I'd be glad to take the pain

I've been trying to touch you the sweet way
You've tried kissing me like the early days
But it's all very cold and it tares me apart
Yea it's too damn cold but we just can't stop now

Wait
We can't fall now
We cannot leave all we have
I know it hurts and feels bad

We should stay
And just fight back
We had it once all the way the whole story
And it will hurt
But I'd be glad to take the pain away

Pain is a side of love we choose to live with you know
After the rainy day the sun will shine so

Wait
We can't fall now
We cannot leave all we have
I know it hurts and feels bad
We should stay
And just fight back
We had it once all the way the whole story
And it will hurt
But I'd be glad to take the pain
