Sugababes, Denial

It's been hard to come to you lately It's been easier to stay away And I can't feel the heat not the one that we would need There is something wrong there's a wall in between

Wait

We can't fall now
We cannot leave all we have
I know it hurts and feels bad
We should stay
And just fight back
We had it once all the way the whole story
And it will hurt
But I'd be glad to take the pain

I've been trying to touch you the sweet way You've tried kissing me like the early days But it's all very cold and it tares me apart Yea it's too damn cold but we just can't stop now

Wait

We can't fall now
We cannot leave all we have
I know it hurts and feels bad

We should stay
And just fight back
We had it once all the way the whole story
And it will hurt
But I'd be glad to take the pain away

Pain is a side of love we choose to live with you know After the rainy day the sun will shine so

Wait

We can't fall now
We cannot leave all we have
I know it hurts and feels bad
We should stay
And just fight back
We had it once all the way the whole story
And it will hurt
But I'd be glad to take the pain
