

Suicide Machines, Sincerity

Some people tell you all about
They know everything there is to know
that they talk, talk, talk and everyone listens
sounds really good but the sincerity's missing

woh
you try so hard to change the world
woh
you'll be into something else next year
woh
you try so hard but its just not there
woh
take a look your own and change yourself

everyone thinks that they got all the answers
everyone thinks that they found the truth
no one thinks that they'll die tomorrow
you gotta find the right choice and the path you follow

seems okay when you scratch your surface
i can see your hearts not in it yeah yeah yeah
you talk so much but you're saying nothing
you got good lines but nobody's listening

its a hard road when the world is against you
seems that way from time to time
well its probably just your imagination
true sincerity can be your salvation

try so hard to change the world
you'll be into something else next year
try so hard but its just not there
take a look at your own and change yourself
take a look at the world and change the future
take a look at everything and start the change in yourself
