

# Sunny Side Up, Little Baby

(D. Dickers)

Little baby  
time is on your side  
I can tell it by that look upon your face tonight  
there are seas full of passion  
shimmerin' inside  
waiting to come out there when the time is right  
And if you wonder  
why I kiss your hand  
that you don't understand  
and it wouldn't make a difference  
if you knew me at all  
there will always be an answer when you call  
If I could I'd shape the universe  
and draw a million stars  
we'd make a giant cruise  
and watch the sun go down  
on Jupiter and Mars  
Little baby  
time is on your hands  
I am callin' out your name  
across this entire land  
there's a lot to be discovered  
there's a whole lot to learn  
there'll be moments that you'll think there's  
nowhere left to turn  
And if you wonder  
why you came along  
it's because you are the reason  
for this simple song  
cos I'm glad you finally made it  
and you're here after all  
there will always be an answer when you call  
(3X)
