

Superbutt, Pioneer

This bug in my head keeps looking at me

I would trade my eyes for your eyes in no time
And so I could see what was seen the whole time
For all these years since you've been here
Raising the flag, hey, you're my pioneer

This bug in my head keeps yelling at me

I would trade my ears for your ears in no time
And so I would know what was said the whole time
For all these years since you've been here
Buzzing around, hey, you're my pioneer

More, give me more
Zap me, help me live a little more
More, give me more
Zap me, help me get more

This bug in my head keeps scratching on me

I would trade my fingers for your fingers in no time
And so I would know what was touched the whole time
For all these years since you've been here
Feeling around, hey, you're my pioneer

More, give me more
Zap me, help me live a little more
More, give me more
Zap me, help me get more

Know me, zap me, help me

More, give me more
Zap me, help me live a little more
More, give me more
Zap me, help me get more
