

Susan Ashton, Our Little World

Don't turn on the radio leave the dishes just let 'em go
No baby nothing's wrong
It's just the locusts humming in the trees the house is softly settling
Listen they're playing our song
I wanna feel you next to me I wanna hear your heartbeat

Come and hold me hold me tight I wanna love you with all my might
Cause all is good and all is right in our little world

It seems the summer just flew on by and it's a warm blue lazy night
Oh baby come look at the moonlight
You and I we've had our share of being lost and running scared for nothing
Oh but that's all right
Dance me across the kitchen floor darlin' these are the moments we live for

Come and hold me hold me tight...
Come and hold me hold me tight...
Cause all is good and all is right in our little world
