

Swervedriver, Up From The Sea

It comes up from the sea
In need of empathy
In need of something seen

You saved them all for me
It's true it's made to be
I hope you'll stay a while

Life springs eternally
In ways so clear to see
Becomes the air I breathe

These words that I can't say
The gifts she brings today
Are timeless in their own way

Up from the sea
It's all for me
Up from the sea

She comes up from the sea
Becomes the song I breathe
She sings what I can't say

Life springs eternally
In need of empathy
I hope you'll stay awhile
