

# Swing Out Sister, World Out Of Control

Watch the day unfold  
And see what blissed out joy it holds  
Catch a breeze and let it go  
You'll see each waking hour embrace you  
Thoughts may come and go  
Soothing an open wound  
You try to save but not too soon  
You turn away and try to turn the pain into a pleasure  
It didn't hurt at all  
But if you fall  
You'll rest assured

Cool as a cold embrace  
A life that's lost without a trace  
The joke's on me when you find out you're laughing  
On the other side of your face  
You can't escape this place  
If you should find yourself  
A passing soul through someone else  
Would you dare to sing a different tune  
Or would it scare you  
That you should care at all  
But if you fall  
You'll rest assured

We're in a world out of control  
Don't close your eyes to the future this time

Cool as a scream in your mind  
Shadows dancing in time  
Where are they now  
Bless all your dying dreams  
Surrounded by your silent screams  
You found there's no-one else to blame  
And no more sympathy  
You've thrown it all away  
But if you fall  
You'll rest assured

We're in a world out of control  
Don't close your eyes to the future this time  
To the future this time  
We're in a world out of control  
We're in a world out of control  
We're in a world out of control
