

Switchfoot, You Already Take Me There

When all I have is on the floor divided, divided
When I'm a world away from peace
Behind your eyes is where I know
I'll find it, I'll find it
'Cause who You are defines my dreams

You already take me there (x3)
Heaven in the here and now

When I'm a broken-hearted man
Complacent and tired
When I've been knocked out of the race
I've been a fool for long enough
To fight it, to fight it
It's in your arms I find my place

You already take me there (x3)
Heaven in the here and now (now)

You meet me where I am
Forgive me where I am

Where I lose myself in grace
(Where I'm lost and found)
I want to lose myself in grace
Let your love reign down all over me
(Over me)
Cover me

You already take me there(x2)
Heaven in the here and now(x3)
