

# Syntax, Bliss

There was a time when we were cradled one on one  
And now I find that all creation is undone  
I&#039;m throwing out all of these thoughts that are not mine  
I&#039;m building up you&#039;re coming down i&#039;m losing time

And now i&#039;ve found some solid ground  
I thought i&#039;d drowned but now i&#039;m found  
And on the lips of life I kiss  
I find I&#039;m here this place of bliss

It&#039;s better now you&#039;ll find that life is on your side  
And you know of glory days the vibe you cannot hide  
I&#039;m giving you the chance to make it all alright  
Baby come on walk with me I know the futures bright

When you dream of themes that drive you to feel insincere  
Think again you know that all those feelings are just fear  
When you&#039;re trilled by ego hits you think you&#039;re on a high  
You should know deep down inside it never satisfies
