

System Syn, Man Made

don't think I'm unaffected because I act like nothing happened
I do that just to save face
but your words came heavy and your words hit hard
and I was affected
yes, your words hurt
when they're pointed at me
yeah, I can play dead
that's what I do best
yeah, I can play dead
if you play along
but don't think I don't care
don't think I don't care
just know I can't show it in those human ways

life is what you make it
I love it when you fake it
I love it when you take me for a ride
life is what you make it
you give but you can't take it
when everything you've ever shown me
makes me wish I never tried

when your words come heavy
when your words hit hard
just remember I'm faking and I really have feelings
I just play unaffected
and you play along
