

# Taff Russ, It Was Love

IT WAS LOVE

By Russ Taft

Oh doctor, I've got a hole in my heart  
The prescription you gave me ain't doing its part  
Take back your medicine, your complicated words  
I found something so simple you're gonna think its absurd  
Stronger than thunder  
Easy to pronounce  
It didn't cost me a penny  
(It was love, it was love)  
(Blinding light from above)  
Yeah (it was love, it was love)  
I was looking everywhere then I finally looked up - come on  
Shocked me, shocked me I can still feel the heat  
From the crown on my head right to the soles of my feet  
You got my attention, stopped me dead in my tracks  
He said stop, uh huh, look up here  
I started shakin'  
To tell you the truth  
It went right to my heart  
(It was love, it was love)  
(Blinding light from above)  
Yeah (it was love, it was love)  
I was looking everywhere then I finally looked up  
(And found love, it was love)  
(Blinding light from above)  
(Yeah it was love, it was love)  
(Oh-wo, I found love)  
I had a big hole in my heart  
And I was lookin', I was lookin' everywhere  
Till something got a hold of me  
And I turned around, and I looked up  
(short break)  
I saw lightthing, and it hit me  
(It was love, it was love)  
(Blinding light from above)  
(Yeah it was love, it was love)  
(I was looking everywhere then I finally looked up)  
And found (love, it was love)  
(Blinding light from above)  
(Yeah it was love, it was love)  
(I was looking everywhere then I finally looked up)  
(And found love)
