

# Tatu, Time of the moon

To begin with the beginning  
not looking in the mirrors  
not brake  
Contacts and coils are burning  
For us it's no use to put them out  
Flame and wind  
It's too late  
to stop us  
we take off  
and we won't hold

Ref:

Time of the moon  
clouds won't decrease  
the fear of height  
We won't change  
To begin with the beginning

Engines roar  
contacts burn  
Flame and wind  
are not to hold  
are not to brake  
we don't give a fuck (literally it's 'we spit' but in russian it's like we don't care)  
we are unreachable

Ref:

Time of the moon  
clouds won't decrease  
the fear of height  
We won't change  
To begin with the beginning  
we are the first  
and everyone else is behind  
We don't care  
engines roar  
we fly  
and everyone else is standing  
no one can stop us  
they should rather begin with the beginning  
cause you know  
to begin is always easy
