## Teenage Fanclub, The Cabbage

Goodbye girl Where did you go? Woke up this morning and I didn't know We were together but now we're not Asked you for nothing that's what I got

It's okay, even better this way That's what they'll tell you That's what they'll say

Are we together? I guess we're not Do you still want me? that's what I thought Look in the mirror and I'm a mess Open the window forget about the rest

It's okay, even better this way That's what they'll tell you That's what they'll say

It's okay, even better this way That's what they'll tell you That's what they'll say
